We help
define, design, brand, build, and advice
Your Web3 Product

Your current **challenge** might be:

Lack of ability
to showcase your
product & brand

No technical
capabilities to bring
your product to market

Lack of visual
identity

Specific AI, Web3
or Infra challenge
– seniority is a need

Scaling of your tech
team is too exhaustive,
time consuming and
expensive

Lack of users,
user friendliness is
missing

or more...
Let us know!

Your product is your story,
make it a good one

>< dclex

The screenshot shows the homepage of the pooldog mining pool. At the top, there's a navigation bar with the logo 'pooldog' (a stylized dog head icon), a search bar containing the hash '0x2911BF64F264...BE1fD792471bF', and dropdown menus for 'Select coin' and '\$ - USD'. The main title 'Building the Future of Mining Pools' is centered above a sub-headline 'One of the most reliable mining pools for beginners and professionals'. A large, cartoonish bulldog wearing sunglasses and a pink shirt is depicted as a miner, sitting on a blue circular base that looks like a mining rig. The bulldog is holding a cocktail glass. A floating hat and dollar signs are in the background. Below the main image, a dark callout box contains the text 'We've already paid out \$15,476,327.66'. The bottom section features a grid of mining pool options, each with a 'Mine' button. The options include 'MimbleW... - MWC', 'Ergo - ERG', and multiple instances of 'Ergo - ERG'. Each pool entry shows monthly income, time to find a block, payout frequency, block confirmation, difficulty, payout threshold, and reward scheme. A large blue decorative swirl is on the right side.

The image shows the homepage of Pooldog, a mining pool. At the top, there's a navigation bar with 'Showing 10 out of 45 coins' and a page indicator '1 2 3 ... 23'. Below this is a section titled 'Latest news' with four cards. Each card contains a snippet of text, a date/time, and a source. The first card is from Cointelegraph, the second from CoinDesk, the third from Decrypt, and the fourth from Decrypt again. A large central button labeled 'Check profitability' with a 'Calculator' sub-label is followed by a cartoon illustration of a dog lying next to mining equipment like an abacus and RAM sticks. Below this is a section titled 'Why Pooldog?' with three sub-sections: 'Wizzard' (Mining pool for everyone), 'Support.' (We got you, dog), and 'Super fast.' (Building The Future). Further down is a section titled 'Start mining with Pooldog' featuring a 'Start mining' button and various mining-related icons. The footer includes links to Company (About us, Our Policy, Terms), Resources (Connection Wizard, FAQ, Tutorials, Blog), Community (Discord, Telegram, Reddit), Contact (Contact us), and social media links. It also mentions support for NiceHash and MiningRigRentals.

The image is a collage of nine screenshots from the 100Colors app, arranged in a grid-like pattern. The screenshots demonstrate various design features:

- Logo Variations / Light BG:** Shows the 'pooldog' logo with a dog icon in black and white.
- Logo Variations / Dark BG:** Shows the 'pooldog' logo with a dog icon in white against a dark background.
- Typography:** A large, bold, white 'Ag' is displayed on a black background with floating yellow hard hats. A legend on the right lists 'Liquid like Savings' repeated eight times.
- MAIN PALETTE / UI:** Displays a color palette with a central hexagon and two rows of color swatches labeled 'Aa'.
- Marketing Assets:** A large, bold, white 'MARKETING ASSETS' text on a black background with floating walkie-talkies.
- Marketing Assets:** A blue-themed marketing asset featuring the 'pooldog' logo and the text 'Building the Future of Mining Pools'.
- Marketing Assets:** A blue-themed marketing asset featuring the 'pooldog' logo and a yellow hard hat icon.
- Marketing Assets:** A blue-themed marketing asset featuring the 'pooldog' logo and three horizontal lines.

BOOKS

The Subsquid Cloud landing page features a dark header with the "sqd" logo and navigation links for Developers, Network, About, Documentation, and Blog. A prominent call-to-action button says "JOIN NETWORK". Below the header, the main heading is "Build and Deploy APIs for Blockchain Data" with a sub-copy about joining developers. A "BOOK DEMO" button is at the bottom left, and a "GET STARTED" button is at the bottom right. The main content area describes Subsquid Cloud as a serverless blockchain indexing platform. At the bottom, three performance metrics are listed: "Uptime >99.0%", "Latency Sub-second", and "Indexing speed Up to 150K blocks/s".

Fix your refund process & retain stop losing valuable customers

Did you know 94% of customers review the refund policy before purchasing? That's why Amazon Prime has a 74% conversion rate by offering hassle-free instant refund options. [Customers shop risk-free and buy more](#)

Better Refund™ supercharges conversion and kills disputes

Save 5% on payment costs and fees

Save 5% on refund processing and admin costs because TodayPay is free for merchants to issue instant refunds. Make your ecommerce channel a profit center and turn refunds into revenues.

Take control of your customer experience

No more being held hostage to payment processing delays and broken return shipping supply chains that anger you, and annoy your customers. You're in control of the experience.

Kill chargebacks and eliminate disputes

Instant refund means instant gratification. If things don't work out on a purchase, customers have no need to raise expensive disputes and waste your time. That enhances your precious authorization rates helping you sell more stuff.

Retain and reward loyal customers

Reward loyal customers with the benefit of an instant refund option. Lose the purchase but keep the customer. They'll buy more from you again and tell their friends about the incredible customer experience. Time is money.

How it works

Merchants

Convert more and dispute less with an alternative payment method for refunds.

- Open account in less than a minute
- Simple setup process for Enterprise customers and small businesses.
- Pick your integration setup
- Refunds problem is finally solved

You retained an unhappy customer with a delightful experience and they'll buy from you again.

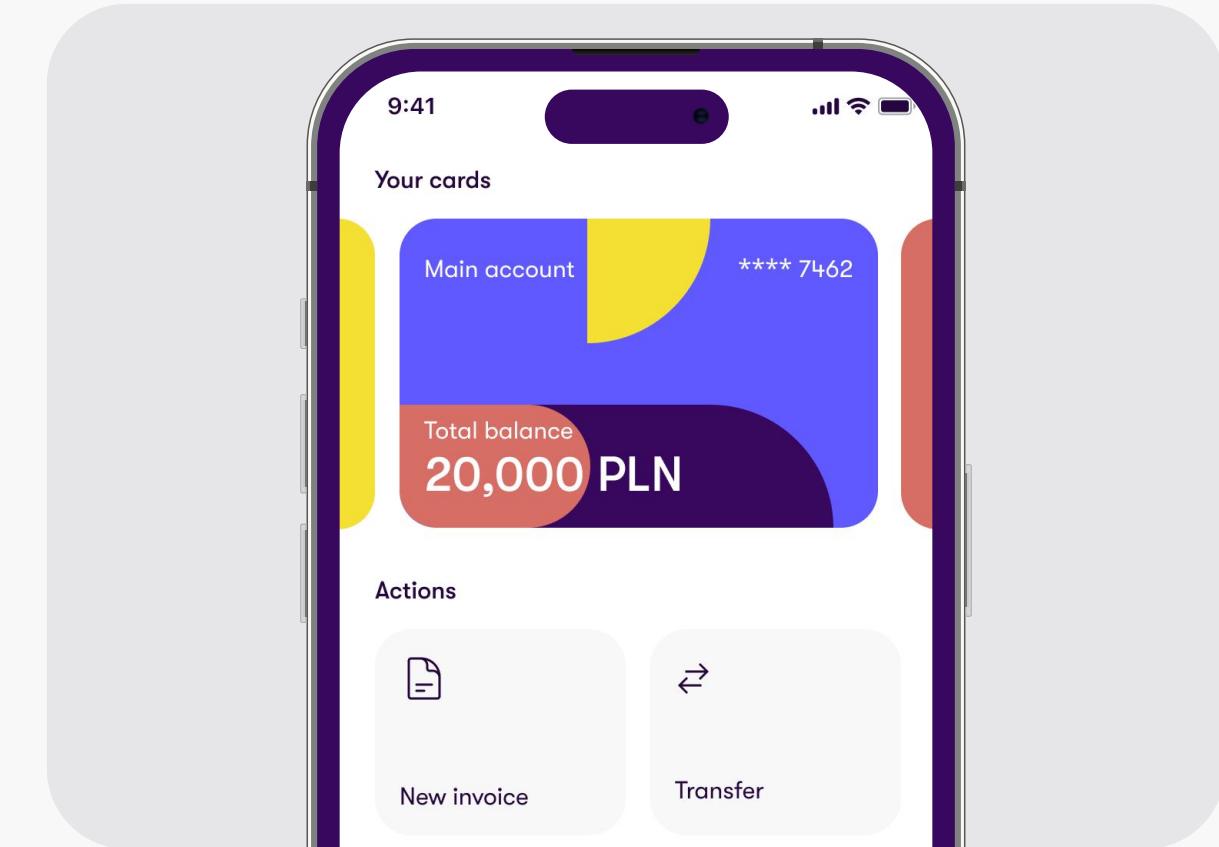

See a demo

Consumers

Explore the simplicity for consumers.

Our mission

TodayPay is the world's first faster refunds payment method and inventor of Refunds as a Service™ category. That means helping merchants, marketplaces, logistics, issuers, and insurers disburse value to their customers instantly, in the payment method and speed of their choice.

There's no time to loose
